The food industry is one of the most demanding sectors in terms of strength and hygiene. DOLAV's unique foam injection method enables the production of thick walls, ensuring our box pallets' durability against damage and wear over time.

Our box pallets include integral runners to prevent accumulation of impurities while allowing safe tipping when emptying using fork lifts.

Our products are made of certified food grade materials and built to withstand extreme temperatures ranging from -40°C to +60°C, making them well suited for cold stores.

## DOLAV Advantages

### Durability

Standard Product

..... wall Cross-section .....

DOLAV Product

- Thicker walls
- Stronger impact resistance
- Made for high performance in low temperatures and cold stores (-40°C)

### Hygiene

- Hygienic ribs
- No cavities
- Easy to clean

### Strength

DOLAV safe stacking method

One piece  
moulding

Stronger walls

Reinforced legs

Integral runners

## DOLAV® Products for the Food Industry

### ACE 1000 | First choice in the market

- 3 Integral runners
- 4 Massive corners
- One piece moulding
- DOLAV safe stacking method
- Ext Dimensions: 1200x1000x740 mm

### Type 1120H | The most hygienic box pallet

- Smooth surface
- 3 massive beams
- Strong reinforced legs
- Unbreakable rounded ribs
- Ext Dimensions: 1120x1120x780 mm

### ACE 460 | The shallow solution

- Shallow design for delicates products (fish, meat)
- 3 Integral runners
- Built-in 2" drainage ports with caps which are easy to remove
- Built-in hoist grips enable easy lifting with standard equipment
- DOLAV safe stacking method
- Ext Dimensions: 1200x1000x580 mm

### Pallets MH | The hygienic pallets serie

- The ideal cleanroom and hygienic pallet for the food industry
- Free from cavities or ribs
- Available with steel reinforcements
- Dimensions:

MH800 1200x800x160 mm

MH1000 1200x1000x160 mm

### DFLC | The world's most hygienic folding box pallet design

- Patented interlocking system prevents buckling under load
- Fully hygienic produced with integral hinges
- Ext Dimensions: 1200x1000x740 mm

### ACE 9 legs | The best solution without Skids

- No runners
- Four way entry
- Hygienic design
- Perfect for forklift truck handling
- Extremely robust
- Ext Dimensions: 1200x1000x740 mm

# DOLAV® InnoVation

## DM Detectable Material Inside!

**DOLAV® is proud to present a new line of detectable materials products**

This new innovation will allow the identification of plastic particles in food products using a standard metal detector. The solution exceeds FDA guidelines on foreign objects in food products.

**The risk: Foreign objects inside food products**

### The Solution:

Standard food processing scanners can now detect DOLAV® plastic to help avoid the risk of plastic foreign objects inside food products.

DOLAV® achieves this by adding a food-approved detectable material particle additive to HDPE during box manufacture. DOLAV® detectable material adds modern, technical innovation benefits to the already proven performance of DOLAV® plastic boxes.

## AM DOLAV's New Revolutionary Plastic Box Pallets Are Here!

### What is Antimicrobial Technology?

A revolutionary technology which provides surface protection from contaminants. Due to this antimicrobial material, you can reduce the presence of microbes, such as bacteria and mould on your product for it's expected lifetime.

This innovation is the newest standard for hygienic Box pallets.

### Antimicrobial Technology - The Benefits

- Lifetime protection
- Reduces bacteria by up to 99.5% in two hours!
- Proven effective against all common microbes including bacteria, mould and fungi
- The product complies with EU Regulation 528/2012

Hygienic design

Extended usable lifetime

Easier to keep clean and fresh

Reduces potential for cross contamination

# Why DOLAV

DOLAV® Plastic Products specialises in the production of large volume products and it has become a leading global manufacturer in the field by virtue of our distinctive structural foam injection technology and high quality products.

Strong and durable, our products are recognized worldwide as the premier solution for storage, transport, warehousing and goods handling.

Our advanced specialisation in high-density polyethylene (HDPE) structural foam injection technology allows us to produce plastic box pallets whereby the thickness of the walls contributes to their strength and stability, ensuring durability against damage and wear over time.

We understand that each one of our products is an essential solution our clients are looking for therefore we offer customized solutions to meet every need.

With more than 40 years of experience, DOLAV® has earned the trust of customers all over the world always providing the best quality and latest innovation to the industries we serve.

The food industry is one of the most demanding sectors in terms of strength and hygiene and our partners in this sector feel secure using DOLAV® solutions which offer a top level of hygienic design, are made of certified food grade materials and built to withstand extreme temperatures ranging from -40°C to +60° C, making them well suited for cold stores.

The combination of these factors makes DOLAV® box pallets ideal for use with meat, fish and food products.

# Customisation

DOLAV® has a fully dedicated team to provide customised solutions for special demands. We have the capability to produce custom boxes with different dimensions and accessories according to the client's request.

Additionally, DOLAV® has acquired vast experience in the design and implementation of special features to produce unique products according to the customer's requirements and today we are proud to lead big projects for the main companies in the field.
