

Data Sheet for Spill Containment Pallet

2 Vertical barrels

Technical Data of Spill Containment Pallet- 2 Vertical barrels	
External Dim (mm)	1200 x 1000 x 580 Length Width Height
Volume (Lt)	445
Cat #:2600400560	

All Dolav box pallets are manufactured by foam injection using high-density polyethylene (HDPE). The special technology results in box-pallets with unique high-impact strength, resistance to corrosion and UV stabilized. The HDPE material used by DOLAV in the production of its box pallets is inherently stable and the working temperature range is -40° to $+60^{\circ}$ C.

DOLAV® maintains a comprehensive Quality Assurance Program, as required by the Standards Institution of Israel and has earned the ISO 9001:2015 Certification. Comprehensive tests are conducted for Dolav products, by the laboratory, at least once every two years.
